MAIN FIELDS OF INTEREST

1. Digital transformation
2. Information Systems Security
3. Business Process Management

CURRENT ISSUES OF RESEARCH

1. Digital transformation

Information and communication technologies are developing and changing at an increasingly rapid rate. To take advantage of this, companies need to be incredibly agile to be able to take advantage of these technologies and then rapidly to perceive new strategies, set up innovative processes in “learning and exponential organizations”.

2. Information Systems Security

Processes and methodologies involved with keeping information confidential, available, and assuring its integrity.

3. BPM and ICT for a cultural, social and economic regeneration of Municipalities

4. Integrated Lake Basin Management based on technology platforms
