5. Civil Economy and Management

CURRENT ISSUES OF RESEARCH

1. Business Ethics

The research, currently underway, aims to analyze the point of view of ethics organizational actors. The goal is to detect the perception that managers have ethical implications related to their professional acting and stimulate reflection on the ethical behavior of managers as part of its corporate mission.

2. Accountability in local government and social reporting tools

The research was aimed to analyze the object, purpose and the critical issues faced by Italian Provinces in the preparation of social reporting and preparation of the social budget model

3. Social cooperatives and social enterprises

The research was aimed to study the "social enterprise" phenomenon in the area and the interactions between social cooperatives and public administrations.

4. Management for Global Health

The project has set itself the goal to develop knowledge and methods of its transmission in the field of global health, become a priority for foreign policy, for national health strategies, for development partnerships and global public goods.

5. The social statements of non-profit organizations in Italy

The research focused on a horizontal analysis of non-profit organizations in various sectors, highlighting some important indicators to check the consistency between the requirements of stakeholders and the degree of accountability achieved by the non-profit organizations analyzed
